NEWS UPDATES

USEPA-NREL Solar Feasibility Study for the former Metachem (aka, Standard Chlorine of Delaware) Superfund Site is now available at: <http://www.nrel.gov/docs/fy13osti/58323.pdf> The Division of Waste & Hazardous Substances' Site Investigation and Restoration Section (SIRS) submitted an application to the USEPA in 2011 for a grant to fund the feasibility study. The National Renewable Energy Laboratory (NREL) provided technical assistance for the project. The purpose of the study was to assess the site for a possible photovoltaic (PV) system installation and estimate the cost, performance, and site impacts of different PV options. The study also reviewed financing options that could assist in the implementation of a PV system at the site. For more information on the RE-Powering America's Land Initiative, please visit: [USEPA's RE-Powering Feasibility Studies webpage](http://www.epa.gov/repower) For more information on the Metachem site, visit: <http://www.dnrec.delaware.gov/whs/awm/Pages/Metachem%20cleanup%20update.aspx>

SITE INVESTIGATION AND RESTORATION SECTION – The Division’s Site Investigation and Restoration Section (SIRS) is responsible for the identification, evaluation and remediation of sites in Delaware that have had past releases of hazardous substances. The Section manages the contaminated sites under three major programs in accordance with the Hazardous Substance Cleanup Act (HSCA). The three programs are the Brownfields Development Program, the Voluntary Cleanup Program (VCP) and the HSCA Enforcement Program (for sites requiring enforcement action).

The Brownfields Development Program encourages the cleanup and redevelopment of vacant, abandoned or underutilized properties, which may be contaminated. A party seeking to develop such a property negotiates with SIRS for a Brownfields Development Agreement (BDA) to perform an investigation and, if necessary, a remedial action or remedy, for the purpose of addressing the risks posed by past releases of hazardous substances at these sites. However, a BDA is only available to parties that are not current site owners. The Voluntary Cleanup Program (VCP) Agreement is available to site owners, who want to clean up their sites and are already liable as a potentially responsible party for the site. Proposed and final plans of remedial action are available online at: <http://www.dnrec.delaware.gov/whs/awm/SIRB/Pages/SIRBPlans.aspx> under “Announcements.” For site-specific information, please see DNREC’s Environmental Navigator at <http://www.nav.dnrec.delaware.gov/DEN3>.
